	Request for Qualifications Design Engineering IL Rte. 31 and Roosevelt Trunk Main Sewer Project # 1063	Based on Addendum # _____

Date: October 15, 2019

TO: Prospective Applicants

The following questions were asked about the project:

1. Are the references to Architectural, Structure, Process, Electrical and Instrumentation Drawings, as well as Division SCI specs (See Page 7 and 8) left over from another project by chance?

Answer: There are no engineering plan sets from past projects.

2. SCADA is referenced on Page 8. Is this correct?

Answer: This is a general conditions page used on all projects, at this time the city doesn't foresee any need for SCADA on this project.

3. The IEPA Loan Program is noted on Page 16. Is this the intent?

Answer: At this time the project is set to be bonded, but the city finance manager determines funding source annually. Due to the size of the project the finance manager could change funding source. The city understands this could impact scope of services and project time line. This will be discussed in detail during the negotiation phase.

4. Generally, how deep are the sewers in this area?

Answer: The depth varies on this project; this will be the responsibility of the engineering firm during the design.

5. Is there any information available on the depth of bedrock?

Answer: Unknown

6. What address shall the RFQ be delivered to?

Answer: With the submittal of Riverside Lift Station and IL Rte. 31 Sanitary project on the same day. The city will accept RFQ submittals at the following two locations. The city apologizes for any confusion, the RFQ submittal is still due on: **Monday October 21, 2019 Prior to: 8:00 AM**

Public Works Building

2nd Floor Administrative Area
